

20th October 2017

Dear Parents,

We are four third year Primary Education students from the University of Chichester, who are currently working through a Wider Curriculum project called 'Making Change Happen'. The project that we are completing is a complete redesign of the Forest School Area at the school. This will include a Mud Kitchen, Music Wall, Storytelling Circle and Fire Pit.

We have chosen Compton and Up Marden as our project focus because as some of you may recall, Miss Pullinger completed a 7 week placement at the school in the summer of this year. Whilst on this placement, she was made aware of the planned changes to the school and thought that this would be the perfect place to complete our project.

We have already had many generous donations of resources to use in the Forest School area, however due to lack of funding, we are still looking for donations of the following resources:

- Sturdy outdoor wood (e.g. decking)
- Wood chippings
- Potential windbreak material

Any donations of these resources would be greatly appreciated by ourselves and the school. If any of you are able to offer any donations, please either contact a member of staff at the school, or if you would prefer, contact us personally to arrange when we can collect the donation.

Contact email: kjubb1@stu.chi.ac.uk

Thank you for taking the time to read this letter,

Yours Sincerely,

Fiona Pullinger, Eleanor Parsons, Kirsty Jubb and Megan Stevens
